Tutorial: Java App

Java Overview

In this tutorial you will be creating a simple Java App with IntelliJ Idea. The tutorial assumes that you already have IntelliJ Idea installed on your computer. For our simple application, we will create an app that rolls dice for a user.

You will learn how to

- Declare local variables

- Create methods

- Create classes

- Create member variables and methods for a class

Setup

First let's start by creating a new project to work on called "ExploringJava"

1. Open IntelliJ Idea and select "Create New Project"
